

Sunset 59 ALFALFA Blend

GENERAL

A non-dormant blend adapted to the low desert areas of Arizona and California. DORMANCY = 9

Disease/Pest Resistance Key

9 = HR; 7-8 = R; 5-6 = MR; 1-2 = S; Blank = No Data

STRENGTHS

- High forage yields
- High levels of resistance to Phytophthora root rot and all the major aphids
- Very good resistance to Stem Nematode anthracnose and Fusarium wilt; moderately resistant to Verticillium wilt
- Provides extended forage production in areas with mild winters

MANAGEMENT TIPS

- Adapted to less-than-well-drained soils where Phytophthora root rot can be a problem
- May be harvested 7 to 9 times per year
- Can be grazed or harvested year-round in areas which do not experience freezing conditions
- Very well adapted to sandy desert soils where Root Knot Nematode may be an issue
